

We currently listen to the KLove stations in our area. According to information that I am hearing and reading in our newspapers, the FCC is considering making changes to FM stations. I do not mind change, but please do not affect my ability to hear my christian music. It is the only postive influence on the radio. I was raised on country music. While some of it is postive, most of it is highly negative. I do not wish to raise my family in such a negative atmosphere. Yes, we watch TV. But we are careful, we monitor what our children watch. We talk about shows that have questionable content. I applaud your attempt to clean up the TV airwaves, increasing fines for non-family friendly talk, etc. But please don't harm or take away positive influences while trying to get a handle on the negative ones. Thank you for taking the time to read my thoughts and give the consideration.
